

Workshop of the Wolf

"Swedish oddbods Workshop Of The Wolf sound almost as unorthodox as their tag, but don't translate that as 'do not buy'. Bumpy, grindy and gravelly as it gets, their music gives into some gusty progressive mega-ludes, in the sweet old seventies taste."

- Dave Attrill, Metalliville Webzine

Workshop of the Wolf is a band from Gothenburg Sweden, with roots in 70s progressive and experimental rock music. They deliver exiting music with a mix of the somewhat odd, dirty and askew, but at the same time beautiful, with influences from bands such as King Crimson and Blue Öyster Cult.

So far the band has released a three track EP followed by the albums "Workshop of the Wolf" and "The Waves".

The new EP "Acoustic" continues in the same peculiar vein with acoustic arrangements of selected songs from the two previous albums.
