

Workshop of the Wolf

Workshop of the Wolf is a rock band from Gothenburg Sweden with roots in 70's progressive/experimental rock music. The band took shape in the fall of 2011 and consists of three musicians with many years of experience from the music scene in bands such as Chuck Norris Experiment, Whyte Ash and Miosis.

After a period of songwriting and rehearsing the band started recording demos during the summer/autumn of 2012. In 2013 the band started playing live and also began recording what would become their first album *Workshop of the Wolf* at Ringön Studios in Gothenburg. The band struck a deal with Transsubstans Records for digital distribution in the spring of 2014. The album is available on Spotify and for download and also on cd through the Transsubstans/Record Heaven webshop.

Musically the band draws inspiration from the aforementioned 70's progressive/experimental rock to make good and exciting music, a mixture of the somewhat odd/askew, but at the same time beautiful. It is a music maybe reminiscent of such bands as King Crimson and Blue Öyster Cult. The band makes sure they are a good a band as possible, both on stage and on record, and invites the audience to good and exciting music.

Members

Henrik von Harten: Guitar and Vocals

Isak Ahlman: Drums

Alexander Walter: Bass
